

Planting Guide

SIX STEPS FOR SUCCESS

DIG

Dig a hole at least twice the size of the pot.

ADD

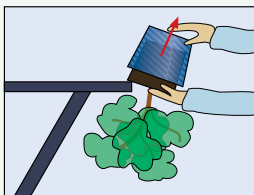

Mix in well 50:50 Soil Improver and existing soil. Add water to planting hole.

FEED

Add native slow release fertiliser to planting hole and mix in. (Amount varies on brands and size of plant)

PLANT

Tip your plant gently out of the pot. Pop it in the hole at the same level as the surrounding soil. Firm gently by hand, creating a shallow saucer.

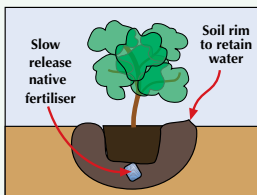

DRINK

Water in well to settle your new plant.

AFTERCARE

Regular watering after planting is important. Water daily in Summer for the first month, then gradually reduce. Water as required in Winter depending on the rainfall.

GUARANTEE

If any plant doesn't succeed, return it with your receipt for a store credit. Outdoor plants are guaranteed for six months. Indoor, tubes and seedlings for six weeks.
